Fill-in-the-Blanks

Instructions: While watching Lesson 1, fill in the missing words according to the information presented by the instructor. [References are found in the brackets.]

Mobile Devices

1. Although a tablet can connect to a cellular network, it cannot be used as a _____. [Cellular-Enabled Tablets]
2. The operating system and platform designed for Apple devices is called _____. [Smartphones]
3. When leaving a voicemail message, it is important to be clear, concise, and use an appropriate _____. [Voicemail]
4. Two common methods used for setting up notifications are _____ and alarms. [Notifications]

Cellular Phones

Description:

Cell phones have become the norm of everyday life. A large majority of people have them and use them on a daily basis if not every few minutes. Most cell phones today also can connect to Wi-Fi or can connect to the Internet using data; these are called smartphones.

For this project, you will need to define what a cell phone is and how they work using towers. Also explain the different carriers and some typical cell phone plans. Then give a brief explanation of what other devices can connect to the Internet using cellular data.

Steps for Completion:

1. Define cell phone.
2. Explain how cell phones connect.
3. Explain the different carriers and cell phone plans.
4. Give a brief explanation of other devices that can connect to the Internet using cellular data:

Understand Smartphones

Description:

Smartphones are used to do business, play games, surf the Internet, and many other things. Having a basic understanding of what a smartphone is and what they can be used for will make sure you start out on the right track to work with smartphones in the future.

For this project, you will explain what types of apps can be installed on a smartphone. Explain what limitations there are with smartphones, as well as some of the capabilities of a smartphone.

Steps for Completion:

1. Answer the following questions in the space provided:
    a. Explain the types of apps used on smartphones and the process to install them.
    b. Describe the limitations and abilities of smartphones.

Difficulty: Beginner

Required Materials: N/A

Objectives:
1.0 Computing Fundamentals
1.1 Mobile Devices
1.1.c Be familiar with smartphone

Configure Voicemail

Description:

For this project, you will need to know the steps to understand how to configure voicemail on an Apple device and set up a password. Then configure the voicemail on an Android device.

Steps for Completion:

1. Configure voicemail on an Apple device:
    a. Tap the Phone icon.
    b. Tap the voicemail option.
    c. Tap Greeting.
    d. Customize greeting or leave default message.
    e. Tap Settings.
    f. Tap Phone.
    g. Tap Change Voicemail Password.
2. Configure voicemail on an Android device:
    a. Tap Voicemail.
    b. Tap menu in upper-right corner.
    c. Tap Settings.

Using Skype

Description:

There many different online options which have instant messaging features such as Gmail, Yahoo mail, Facebook, and Skype. Having a working knowledge of these options can be beneficial for jobs and social media.

For this project, you will set up a Skype account and then use it to chat with someone.

Steps for Completion:

1. Set up a Skype account.
2. Chat with someone.
3. Take a screen shot of your conversation to share with your teacher.

Difficulty: Beginner/Intermediate

Required Materials: Computer, mobile device, or tablet with Internet access

Objectives:
1.0 Computing Fundamentals
1.1 Mobile Devices
1.1.f Use of instant messaging

Set Up Notifications

Description:

When using mobile devices it is important to understand how to change and set up the notifications for your device. It could be very embarrassing if your device continues to make noises because your crops are ready to harvest and you are in the middle of a meeting or a class.

In this project, you will use an iOS on an iPhone to set up notifications on the device. You will need to change notification sounds and change how many times your alerts repeat for your messages.

Steps for Completion:

1. For an iPhone device:
    a. Navigate to your notification menu.
    b. Select Messages.
    c. Allow notifications.
    d. Change notification sound.
    e. Allow for it to show on Lock Screen.
    f. Change repeat alerts to twice.
2. For an Android device:
    a. Navigate to Sound & notifications.
    b. Set to allow only priority interruptions.
    c. Specify which options are priority.
    d. Navigate to the App notifications.
    e. Block or set apps as priority.
