File Types

Description:

When working with computers you will be dealing constantly with different file types to open up documents in different software applications. Knowing which file types are compatible with various software applications is very important.

For this project you will use the following document to define the different file types and explain which file types are compatible with which software applications.

Steps for Completion:

1. Define the terms below:

a. .doc/.docx:

b. .txt:

c. .xls/.xlsx:

d. .exe:

e. .swf:

f. .pdf:

g. .wav:

h. .zip:

i. .jpg:

j. .tif:

k. .mp3:

m. .avi:

l. .mp4:

Folder Rename and Find

Description:

As you continue to use your computer you will save more and more documents, you will have a lot of files and folders. Sometimes you will need to rearrange the files or folders and to manage your information you may need to rename folders. Also, you may need to quickly find a file and you do not want scroll through all the files.

For this project you will need to create a folder on your desktop and add documents to the folder. Then you will need to rename the folder to Computing Fundamentals. Write a brief explanation of how to find a file without scrolling to find it.

Steps for Completion:

1. Create a new folder on the desktop.
2. Add files to the folder.
3. Rename the folder.
4. Write a brief explanation for finding files.

Project File: N/A

Difficulty: Intermediate

Required Materials: Computer

Objectives:
1.0 Computing Fundamentals
1.3 Computer Software Architecture
1.3.f Know file structures and file/folder management
1.3.f.i Moving/renaming files
1.3.i Search for files

Manage Electronic Media

Description:

There are several different ways to manage electronic media. Understanding how to manage eBooks, music, and video is very important so that you can access the information.

For this project you will need to explain which software programs you use to manage your electronic data.

Steps for Completion:

1. Describe the software programs you use to manage your electronic data:

Permissions and Rights Explained

Description:

Rights and permissions are a vital part of any organization that uses computers and shares files on an internal network. The rights and permissions allow users to access files that they need to use to complete their job but it also restricts the use of some files that may be confidential or that someone does not want edited.

For this project you will explain in more depth why permissions are so valuable in an organization.

Steps for Completion:

1. Explain why rights and permissions are so important to an organization:
