Fill-in-the-Blanks

Instructions: While watching Lesson 6, fill in the missing words according to the information presented by the instructor. [References are found in the brackets.]

Computer Software Architecture Part III

1. Scanning is the process of _____ a physical item into a digital medium. [Document Scanning]
2. Software can be installed, uninstalled, and updated on a Windows machine in the _____. [Install, Uninstall, and Update Software]
3. Two signs a virus or other form of malware may be on a computer include receiving an _____ or when an application stops working for no reason. [Basic Problem Solving]

Install and Uninstall Software

Description:

Software can be installed on to your computer or other devices using the Internet. A computer can also have software installed using local media such as a disc or flash drive.

For this project you will use the Ninite website to install a media feature such as iTunes or QuickTime, a utilities feature such as Glary or CDBurnerXP, and a security feature such as Essentials or Avast. If available use a flash drive or disc to install another software program. Since you do not really need all of these software programs you will then go in and uninstall the utility and security features that you installed.

Steps for Completion:

1. Go to ninite.com.
2. Download a utility, media, and security feature.
3. Download another software program flash drive or disc.
4. Uninstall the utility and security features.

Software Architecture: Install, Uninstall, and Update Software

Project File: N/A

Difficulty: Intermediate/Advanced

Required Materials: Computer with Internet access, Flash drive or disc with another software program

Objectives:
1.0 Computing Fundamentals
1.3 Computer Software Architecture
1.3.l Know how to install, uninstall, update, repair software
1.3.l.i From the Internet
1.3.l.ii Using local media (DVD-ROM, etc.)

Troubleshooting Issues

Description:

The joy of technology is that there will always be problems. To know how to troubleshoot these problems will save you a lot of time and heartache.

For this project you will use the following document to look over different computer issues and explain methods used to troubleshoot these issues.

Steps for Completion:

1. Answer the questions below in the spaces provided:

a. What steps should be taken when media will not play?

b. What steps should be taken when an error message appears?

c. What steps should be taken when a computer freezes?
