LearnKey

Fill-in-the-Blanks

Instructions: While watching Lesson 9, fill in the missing words according to the information presented by the instructor. [References are found in the brackets.]

Cloud Computing

1. Cloud storage can be used to back up data on a _____ and it allows users anywhere in the world to access data as long as they have an Internet connection. [Cloud Basics and Benefits]

2. Cloud services are mostly free to set up, however payment is often required for _____ . [Using the Cloud]

3. A _____ is used to administer, deliver, and track the progress of users in an eLearning environment. [Web Apps vs. Local Apps]

4. Google Docs, Sheets, and Slides are online Office apps used in _____. [Online Office Apps]

LearnKey

Cloud Concepts and Benefits

Description:

The first step in using cloud storage is to know what it is and its related concepts.

For this project, you will define a list of cloud storage and access features and list a few benefits of sharing, collaborating, and using cloud storage.

Steps for Completion:

1. Answer the questions below in the spaces provided:

a. Define cloud storage and cloud access.

b. List at least one benefit each for sharing, collaborating, and using cloud storage.

Cloud Computing: Cloud Basics and Benefits

Project File: N/A

Difficulty: Beginner

Required Materials: N/A

Objectives:
1.0 Computing Fundamentals
1.6 Cloud Computing
1.6a Understand "cloud" concepts
1.6a.i Understand cloud storage vs. cloud access concepts
1.6a.ii Understand sharing and collaboration via the cloud
1.6b Know the benefits of using cloud storage

SaaS and LMS

Description:

When dealing with web and local apps, it helps to understand Software as a Service. In addition, when you use a cloud as a student, you will no doubt use a Learning Management System.

For this project, you will define SaaS and LMS.

Steps for Completion:

1. Answer the questions below in the spaces provided:

a. Define SaaS.

b. Define LMS.

Online Storage Apps

Description:

In most work environments, you are going to deal with an online storage app. Whether it is Google Drive or Dropbox, OneDrive or iCloud, chances are you will need to know how to upload, download, and sync content using online storage apps.

For this project, you will use Google Drive to upload content and download content from the cloud.

Steps for Completion:

1. Open Google Drive and upload a local document to it. You can do this by directly dragging a document from your desktop or local documents folder to Google Drive.
2. Right-click a document on Google Drive and download it to your local desktop.

Project File: N/A

Difficulty: Beginner/Intermediate

Required Materials: Computer

Objectives:

1.0 Computing Fundamentals
- 1.6 Cloud Computing
  - 1.6c Access and utilization of the cloud
    - 1.6c.i Understand account management on the cloud
    - 1.6c.ii Know how to upload content to the cloud
    - 1.6c.iii Know how to download content from the cloud
    - 1.6c.iv Know how to sync files between devices using the cloud
  - 1.6e Understand Web app types
    - 1.6e.i Online storage apps [Google Drive, Dropbox, OneDrive, iCloud storage]

Online Office and Database CRM Apps

Description:

The more you know about apps, the better off you will be in a work environment. Common apps you will often deal with are online office and database-driven Customer Relationship Management (CRM) apps.

For this project, you will use Google Docs to create a new document and navigate to three prominent CRM apps.

Steps for Completion:

1. Open Google Drive and create a new document using Google Docs.
2. Navigate to the Salesforce, Oracle, and Workfront CRM apps.
