Security: Usernames and Passwords; Basic Account Settings

Project File: N/A

Difficulty: Intermediate

Required Materials: Microsoft Access

Objectives:
1.0 Computing Fundamentals
1.7 Security
1.7a Know credential management best practices
1.7a.i Usernames
1.7a.ii Passwords
1.7a.ii.1 Understand the components of a good password
1.7b Know basic account setting management

Define Malicious Programs and Attacks

Description:

Knowing when you have a malicious program on your computer and how attackers can utilize them will help you protect yourself and your computer.

For this project you will define different terms regarding malicious programs and attack methods.

Steps for Completion:

1. Define each term below:

a. Virus:

b. Malware:

c. Monitoring Software:

d. Trojan Horses:

e. Social Engineering:

Security: Viruses; Types of Virus

Project File: N/A

Difficulty: Beginner /Intermediate

Required Materials: N/A

Objectives:
1.0 Computing Fundamentals
1.7 Security
1.7c Know the basic threats to security of computers, data, and identity
1.7c.i Viruses
1.7c.ii Trojans
1.7c.iii Malware
1.7c.iv Social engineering
1.7d Understand the implications of monitoring software (surveillance)

Windows Defender and Firewall

Description:

It is vital to know how to protect your computer. Luckily, Windows 8 comes pre-installed with antivirus software and a built-in firewall.

For this project you will navigate to the Windows Defender app and perform a scan of your local computer. After that, you will go to the Windows Firewall and deny access to an application.

Steps for Completion:

1. Navigate to the Windows Defender App.
    a. Perform a quick scan of your computer.
2. Navigate to the Windows Firewall.
    a. Allow or deny a program through the Windows Firewall.

Security: Antivirus and Firewalls

Project File: N/A

Difficulty: Beginner/Intermediate

Required Materials: A computer with a Windows operating system

Objectives:
1.0 Computing Fundamentals
1.7 Security
1.7f Know the use of and importance of antivirus software
1.7f.i Understand how to prevent virus issues
1.7f.ii Understand how to maintain and update antivirus software
1.7g Know the use of firewalls and basic settings
